Professional Summary

Versatile Full Stack Developer and Data Analyst with a rich background in end-to-end software engineering and operational data analytics. Experienced in delivering custom full-stack web applications using modern technologies such as Python (Django, FastAPI), Rust (Axum), Go (Gin) and JavaScript/TypeScript (React, Next.js, Bun). Proven track record in data analysis, constructing automated data pipelines with Polars/SQL, and translating complex metrics into actionable business decisions.

Personal Projects

WaveRider Nusantara - Interactive Web Game (React.js)

Link : <https://waveridernusantara.vercel.app>

DataFam Mumbai - Data Enthusiast Community Platform (Django & Tailwind CSS)

Link : <https://www.datafammumbai.site>

Experience

Freelance Full Stack Developer - Self-Employed (2022 – Present)

- Engineered and deployed 15+ custom web applications with 99.9% application uptime.
- Optimized backend APIs and microservices, cutting response latency by 40% for high-traffic client platforms.
- Designed database architectures that improved client satisfaction by 98%.

Operations Manager - LPK Kalleria, Kutai Barat (2022 – 2026)

- Analyzed and modeled 300+ monthly operational data points to identify key trends and inefficiencies.
- Developed and maintained dashboards, driving data-informed decisions for executive leadership.
- Standardized data collection achieving a 95% on-time project completion rate.

Instructor and Academic Staff - Ghanesa College, Samarinda (2019 – 2022)

- Taught IT fundamentals and data-related subjects to around 100 students weekly.
- Developed 5 computer curriculum modules aligned with industry standards.
- Mentored 100+ students, improved student grades by 15% within two semesters.

IT Support - Ghanesa Group, Samarinda (2017 – 2019)

- Maintained 30+ IT infrastructure devices and ensured stable system operations and data flow.
- Resolved technical issues in under 24 hours, minimizing downtime.
- Supported digital campaigns with data insights, contributing to a 20% sales increase.

Education

Institute of Informatics and Computer Management (STMIK Widya Cipta Dharma), Samarinda (2016)

Bachelor of Computer Science - Information Systems (GPA: 3.03 / 4.00)

Skills

Frameworks & Runtimes :

Django, FastAPI, Axum, Gin, React, Next.js, Bun.

Languages & Web Technologies :

Python, Rust, Go, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, RESTful APIs, Docker, Git & GitHub.

Databases & Data Analytics :

SQL (PostgreSQL), Microsoft Excel, Tableau, Looker Studio, Python (Polars, NumPy), Data Analysis & Visualization.

Design & Visualization :

Graphic Design, Illustration, Architecture and Interior Design, Visual Branding.

Communication & Soft Skills :

Public Speaking, Technical Presentation, Copywriting, Problem-Solving, Attention to Detail, Time Management, Mentorship & Interpersonal Guidance.

Certificates

Python Developer Certification - FreeCodeCamp (2026)

AI Ready ASEAN - ASEAN Foundation (2025)

Ask Questions to Make Data-Driven Decisions - Google (2025)
